MAGAZINE

一份拓展思考者視野的雙語雜誌。

**AN EYE-OPENING BILINGUAL MAGAZINE
FOR THINKING PEOPLE.**

By Kan Ev Art

THINK

It's not illegal yet...

KANEV 16

**THE LAST CONSPIRACY I QUESTIONED
SHOULD HAVE BEEN THE FIRST.**

我最後質疑的陰謀應該最早提出才對。

IT EXPOSES EVERYTHING.

它揭發了一切真相。

這是本什麼樣的雜誌呢？

What is this magazine?

Sometimes when people are introduced to a different world view from that of their own, they become rather upset. This is because most people are in a state of brainwashed slumber "The Walking Dead" style. When the mindless masses are given an idea that isn't what they have been programmed to accept, the outcomes are most typically an attitude of un-acceptance (taking closet opinions into consideration).

In some tribal cultures there have been very different traditions throughout history, and norms that what we might find unacceptable today. The chief of the tribe offering his new friend sex with his wife in a gesture of kindness for example, is something that today, most would find totally unacceptable. Two men kissing each other and holding hands in the park, might have been a lot more outrageous not so long ago.

If a worldview threatens your paradigm, and you become upset or engage in shit slinging, this magazine is not for you. If you do not have a sense of humor, this magazine is definitely not for you. If you don't just put it back where you found it, but rather decide to stop whatever proliferation of ideas you may find too dangerous and irresponsible to have in circulation, then according to anything learned from history, you are indeed more dangerous and irresponsible.

For those who are open minded enough to not be stupid, but rather excited to possess and/or share this great work of mind-bending, I'm very happy you found us. The aim is for this magazine to uniquely and profoundly make you THINK - it's not illegal yet.

當人們聽到有別於自身所信的世界觀時，有時他們會很不高興。這是因為大多數人都處於一種被洗腦的催眠狀態，如同「陰屍路」中的僵屍一般。當無腦的大眾接觸到不是他們被設定來接受的觀念時，經常就會表現出不接受的態度（某些人可能暗自接受，但假裝不以為然）。

綜觀歷史，某些部落文化有著非常不同的傳統，還有我們今天可能會難以接受的規範。舉例來說，部落酋長讓新朋友和酋長妻子發生性行為，藉此表達善意，這對今天的大多數人來說是完全無法接受的。兩個男人在公園裡牽手和親吻，在不久之前可能還被視為傷風敗俗的舉止。

如果一種世界觀威脅到你的思維形式，你就會不高興或口出惡言，那麼這本雜誌就不適合你閱讀。如果你沒幽默感，就千萬不要讀這本雜誌。如果你不把它放回原處，反而決定不讓你視為太危險或不負責任的想法繼續擴散流通，那麼依據歷史的教訓，你才真的更危險和不負責任。

如果你心胸夠開放、不愚昧，反而很興奮能夠得到和/或分享這件拓展視野的傑出作品，那麼我很高興你找到了我們。這本雜誌的宗旨是在於讓你以獨特、深刻的方式去「思考」—它目前還沒被列入違法行為。

About ISSUE #2

關於第 2 期

As you probably already know, this is a resource of inspirational mind-bending for thinking people. And, as you may have gathered by the cover, or flipping through, this ISSUE #2 is unapologetically flat earth. The sign of a great thinker is one who can entertain a thought and not accept it. We are going to dive into this topic and the result will be the unraveling of so much more. We accept the reality of the world with which we are presented. I would also like to mention to any smart-ass globe heads who may get excited about a number I use, or source of the information presented, to kiss my ass. Kiss it really good. These haters ought to spend time digging into things themselves and maybe they will learn something, but for them, and maybe their legal team, a disclaimer: Nothing in this resource is real, true, or scientific. Everything is la-la-land, reptilian shapeshifting, alien style! Buckle up, and enjoy!

"Truth sounds like hate to those who hate truth." -Proverbs 9:7-8

"Those who are able to see beyond the shadows and lies of their culture will never be understood, let alone believed, by the masses." -Plato

"No one is more hated than he who speaks the truth." -Plato

你可能已經知道，這是個讓思考者拓展視野、激發靈感的資源。而且，你也可能已經從封面或快速翻閱看出，這本第 2 期直言不諱地在探討地平說。偉大思想家的特徵是：他可以考慮一個想法，但不照單全收。我們將深入探討這個主題，結果會拆穿諸多謊言。呈現給我們的世界實境，我們全部買單。另外，自作聰明堅持地圓說的，如果我引用什麼數字或提出哪個資訊來源會讓你抓狂，就來親我的屁屁吧。好好親一親。這些心懷怨恨的人應該要自己下功夫研究探索，那可能就會學到點東西；不過我要給他們（還有可能他們的法律團隊）一項免責聲明：這些資料來源都不是真實、誠信或科學的。一切都是外星風格的奇幻世界、爬蟲類變身故事！繫緊安全帶，出發探索囉！

「對憎恨真相的人，真相聽起來就像仇恨。」—箴言 9:7-8

「那些能看穿他們文化的陰影與謊言的人永遠不會被大眾所瞭解，更不用說相信。」—柏拉圖

「說實話的人最顧人怨。」—柏拉圖

Why the hell this topic?

I have certainly been faced with ridicule, to say the least. The short answer is that I have found this topic VERY interesting. I am well aware it is the sort of topic that gains a reaction of immediate dismissal and eye-rolling exasperation. It certainly did for me until recently. This world is full of different kinds of people. Different body types, fashion styles, talents, and so on. I want to prevent the odious culture of speech nannying, by celebrating my freedom of speech. If you have never entertained or appreciated a conspiracy theory, this is really and truly NOT for you.

Most people I have asked in Taiwan believe that Adolf Hitler was behind the deaths of more people than Mao Zedong. Let that sink in. This doesn't mean that most people in Taiwan are stupid, but rather ignorant victims of a pathetic government indoctrination program, that includes the educational and mainstream media areas by and large. It is not unique to Taiwan. There are people in North Korea who believe that when Kim Jong-un goes outside, the clouds clear and birds sing. I have noticed that there are STILL grown adults who claim to be lawyers, skeptics, critical thinkers, and the like, who vehemently defend that three buildings fell on September 11, 2001 because of two airplanes. This last example of ignoramuses is the bunch that ironically behaves the most nasty when met with opposition. Wolves don't concern themselves with the opinions of sheep and if you think you are ready to loosen your grip on your own paradigm, I hope you enjoy this ISSUE #2. If you are not the reader I am looking for, I can also appreciate.

I have a hunch, sadly many mouthpieces of malice are just dying to bash my company, name, and character into the ground in their nasty social media echo-chambers, void of any constructive thinking or criticism. Queer and fragile petri dishes of arrogant, rude, insecure, duplicitous pussies.

The intent of this topic is to, if nothing else, give you a better understanding of what flat-earthers are thinking and hopefully, better understand why. This is not a cult, or an outreach for more to join. It is simply a very successful attempt (despite what the catatonic may say) to make you THINK - it's not illegal yet!

到底為什麼要談這個主題？

不消說，我當然被嘲弄揶揄過。簡短的回答是，我覺得這個主題非常有趣。我非常瞭解這是那種人們會馬上打發掉或翻白眼的話題。直到最近，我原本也是如此反應。這個世界充滿著形形色色的人。不同的體型、時尚風格、才能等等。我要藉著頌揚我的言論自由來遏止言論監控的醜惡文化。如果你從沒考慮或意識到陰謀論，那這本雜誌就真的不適合你。

我在台灣問過的大多數人都相信希特勒屠殺的人比毛澤東多。感受一下。這並不代表在台灣大多數的人都很笨，而是政府透過教育及主流媒體兩大管道進行可惡的思想灌輸，讓人們成了無知的受害者。不只是台灣有這種現象。在北韓還有人相信當金正恩出門的時候，天會放晴，鳥兒會歌唱。我注意到還是有自稱是律師、懷疑論者、批判性思想家等等的成年人氣急敗壞辯稱三棟建築物在 2001 年 9 月 11 日倒塌的原因是兩架飛機。很諷刺地，最後提到的這群腦殘是在遇到相反意見時表現得最下流的一群人。狼不會擔心羊的看法，如果你覺得已經準備好放開思維了，那我希望你會喜歡這本第 2 期。如果你不是我在尋找的讀者，我也可以理解。

很遺憾地，我有個預感，很多心懷怨恨的大聲公沒有任何建設性的思維或批評，只迫不及待想在他們齷齪的社群媒體迴音室裡大力猛轟我的公司、名譽和人格。一堆滋生在培養皿裡的病菌，自大、無禮、沒安全感、白賊的娘炮。

這個話題最主要的意圖在於幫你進一步認識地平論者在想些什麼，也希望你能更瞭解其中原因。這不是異教，也不是找更多人加入的推廣計畫。我們只是很巧妙地（管他那些神經病說什麼）在試圖讓你「思考」——它目前還沒被列入違法行為！

All space agencies are stealing your money, because they don't go to space! Hundreds of billions of dollars for 'space programs' every year. They are stealing your money and showing you cartoons and CGI. About 500 years ago a bunch of Freemasons proposed the Earth was a spinning ball around the sun, then 500 years later, a bunch of Freemasons at NASA 'went to space' and saw exactly that. Seems legit. Why the ball earth lie? Did we actually go to space/the moon/mars? Is there more land out there to be discovered?

They have stolen your mind, and are working on your soul. And filled your head with so much bullshit that nothing you believe is true (anymore)! We've been shown very different "pictures" of this supposed ball earth. Continents changing their sizes completely, and most are so asleep that they say the angle of the camera makes the North American continent look double in size. Seriously? According to Robert Simmon, the NASA dude who created the iconic 'blue marble', "it is photoshopped, but it has to be". You do know that there has never been a picture of your beloved globe earth right? You ought to understand that the "crazy" flat earth people are often times smarter than others because they have at least questioned their reality.

Balloon photos show a flat white horizon. Do you remember that guy who jumped from the edge of space? His name was Felix Baumgartner. In the video, when he opens the door you see a flat white horizon. Then in the same video you find a curved landmass, New Mexico, that is the whole earth, fisheye-lens style. He took off from Roswell international air center in a balloon and took 2.5 hours to reach his jump altitude of 128,000 feet, only to return to earth a few miles from the site in the opposite direction than would be expected if the Earth is turning from West to East. Are you so asleep that you can see the curve in this video and say "Look, it's a ball!"?

Satellites are a ruse. People even say they can see them. You can't see a bus from 100 miles away and you most certainly can't see satellites from hundreds of miles away! It is science. International data is transmitted through submarine cables. We also use high-altitude balloons, planes and drones, towers, antennas, and parabolic reflectors. Did you know that airplane GPS transponders are turned off when flying over 200 nautical miles off the coast of the oceans south of the equator? Yeah... 'global positioning' indeed.

飛行的模式一直都在表現出世界是平面的！我們被告知因為南極大陸「太冷」而不能飛過。在此同時，報章雜誌告訴我們未來會在月亮上建造膠囊旅館。我們被告知，我們在火星上發現水了，而且還真的用機器操作的探測車分析了地表的年齡。在此同時，世界上有人們正死於乾旱。他們在偷我們的錢！美國著名的天體物理學家和演員尼爾·德格拉斯·泰森說，「如果你想拿 3.5 兆美金來用，那什麼都辦得到。」他還說地球不是個球體，而是「扁球體」。也許他才是扁球體，還是個共濟會白賊加腦殘。我真的從來沒看過有人可以在解釋「科學」的時候引用那麼多的好萊塢電影！

所有的太空總署都在偷你的錢，因為他們根本不上太空！每年的太空計畫都耗費幾十億美元。他們在偷你的錢，然後給你卡通和電腦成像 (CGI)。大約 500 年前一堆共濟會的人提議世界是顆繞著太陽轉動的球，然後在 500 年後，一堆在美國國家航空暨太空總署 (NASA) 的共濟會成員「去到太空」，而所見的確如此。好像很正當。為什麼要說世界是球體的謊言？我們真的有上到太空/月亮/火星嗎？是否有更多土地在等著被發現？

他們已經偷竊了你的心智，而且正在對你的靈魂下手。他們在你的腦筋裡塞滿了狗屎，你相信的一切（再也）沒有什麼是真的了！我們看到了這個據說是球體的世界非常不同的「照片」。陸地的大小完全改變了，而大部分的人還在沈睡中，他們說相機的角度讓北美洲看起來是實際大小的兩倍。莊孝維？根據在 NASA 創作了代表性的「藍色彈珠」(The Blue Marble) 的那個傢伙 Robert Simmon，「照片是用 Photoshop 合成，但那是必須的。」你心愛的地球從來沒有過一張照片，這件事你知道吧？你應該瞭解的是，「瘋狂」的地平論者經常都是比較聰明的人，因為他們至少有質疑所謂的現實世界。

氣球拍攝的照片顯示出平坦的白色地平線。還記得從太空邊緣跳傘的那位大哥嗎？他的名字是 Felix Baumgartner。在影片裡，當他打開門的時候，你看到的是平坦的白色地平線。然後在同一支影片裡，你看到一大片彎曲的陸塊（新墨西哥），那是用魚眼鏡頭拍攝的整片陸地。他搭乘氣球從羅斯威爾國際航空中心，花了兩個小時半才達到跳傘高度，結果落地時卻在（如果地球是由西向東轉動的話）預估的降落點相反方向的幾公里之外。你真的這麼神智不清，可以在這支影片裡看到弧度，說「看，那是顆球！」嗎？

衛星是騙人的。人們甚至說可以看到它們。你看不到 160 公里以外的公車，更不用說幾百或幾千公里之外的衛星了！這是科學。國際數據是經由海底電纜傳輸的。我們還用高空氣球、飛機和無人機、高塔、天線，還有拋物面反射器。你知道飛機在飛到超出赤道以南海岸 200 海里的時候，GPS 應答機就會關閉嗎？對啊...真的是「全球定位」。

robbed!

Flight patterns tell a story of a flat earth all day long! We are told we can't fly over Antarctica because it is "too cold". In the meantime, we are fed articles of future moon pod hotels. We are told that we have found water on Mars and actually analyzed the age of its surface with a robotically operated rover. In the meantime, people are dying of thirst on Earth. They are stealing from us! It was Neil deGrasse Tyson, a renowned American astrophysicist and actor, who said "If you want to do something with \$3.5 trillion dollars, you can do whatever you want." He also said the earth is not a sphere, but an "oblate spheroid". Perhaps it is he who is the oblate spheroid, and a Freemason fraudster, who doesn't know shit from putty. I've never seen a man who could make as many references to Hollywood movies when explaining 'science', as he can, that's for sure!

Folks say they can see the curve from a balloon, plane, tall building and so on. NO you can't! There is no curve. It is easy to check: 8 inches of curvature a mile, and you have to square the mile. Therefore, the next mile is 32 inches, and this continues. At 50 miles we are at 667 feet of drop. How can the Chicago skyline be seen from across Lake Michigan? They tell you it's a mirage. A mirage is an inverted image. Chicago isn't inverted. Wakie-wakie. Most people are so brainwashed that "it's an infraction" seems to be all it takes to dismiss this and move on.

"You can see the curvature when a ship disappears over the horizon"... Riiiiiiight😏. Go to a beach, take your telescope... BOOM. The disappearing boat just magically re-appears. Wake up!

The images (not photographs) NASA is feeding us are complete CGI fantasy. Other countries have space programs and interestingly enough, they see the world and space differently. CHECK IT OUT! There is no conspiracy theory here. Visiting different official space exploration websites is not hard to do. Use your eyes and look at the original lunar module. It was a piece of shit that didn't have the computing power of a cellphone. It looks like a homeless twerker tent. When NASA falls, this house of cards will fall as well. You do know that NASA claims they "lost" the original footage of their moon landing right? They also lost 14,000 reels of flight telemetry. Space is fake! It is all a CGI movie! Our taxes are paying for it, *period*.

They want to steal your mind from you. They are hellbent on filling your brain with so much bullshit that nothing you believe is true. They are evil and trying to keep you away from your creator. They want you to think you came from a magical explosion and that you evolved from a monkey! *That is the deception*. They don't want you to find out who or what God is. They are keeping it from you!!! (I'm gonna blow!!!!!!💣) ...There is also the possibility of more land... Whatever the reason, it is very evident we are being lied to and robbed!

人們說可以從氣球、飛機、高的建築物等等看到曲線。錯，你不行！曲線並不存在。查看是很容易的：一英哩（約 1.6 公里）會有 8 英吋（約 20 公分）的曲度，而你必須求英哩的面積。所以，下個英哩就有 32 英吋（約 81 公分）的曲度，依此類推。在 50 英哩（約 80.5 公里）會有 667 英尺（約 203 公尺）的落差。這樣的話，為什麼從密西根湖可以看得見芝加哥的天際線？他們跟你說那是海市蜃樓。海市蜃樓是倒像。芝加哥並沒有倒轉過來。醒醒吧。大部分的人都已經被重度洗腦，只需要跟他們說「那是反常現象」就可以讓他們把這個現象置之不理，問題解決了。

「當船隻消失在水平線，你就可以看到曲度」...是喔😏。帶你的望遠鏡去海邊...砰。消失的船又神奇地重新出現了。醒醒吧！

NASA 給我們看的影像完全都是 CGI 奇幻。其他國家有太空計畫，有趣的是，他們看待世界和太空的方式很不一樣。去看看吧！這裡沒有陰謀論。造訪不同的官方太空探勘網站並不是難事。睜大眼睛，好好看一下最早版本的登月小艇。那是堆破銅爛鐵，計算能力連手機都不如。看起來像毒蟲街友的帳棚。NASA 垮台的時候，這座紙牌屋也會隨之傾倒。你知道 NASA 宣稱他們「失去了」登陸月球的原始影片，對吧？他們也失去了 14,000 卷的飛航遙感勘測。太空是假的！那全都是 CGI 電影！我們在納稅幫它買單，就是這樣。

他們想竊取你的心智。他們拼命往你的腦筋塞狗屎，你相信的一切沒有什麼是真的。他們很邪惡，試圖讓你遠離你的造物主。他們要你相信你源自一場魔法般的爆炸，而且從一隻猴子演變而來！那是騙局。他們不想讓你發現上帝是誰，還是什麼。他們把你蒙在鼓裡！！「我要「射」啦！！！！💣」...而且還有更多陸地存在的可能... 不管是什麼原因，很明顯，我們被騙還有被搶了！

Globe History

Early depictions of earth show it to be flat and enclosed by a dome. The Egyptians, Norse, Hindus, Mayans, Incas, Navajos, Hebrews, and others, all knew that the earth is flat and covered by the firmament, an impenetrable barrier encapsulating the flat plane. This understanding dominated until 1543 when Nicolaus Copernicus proposed the heliocentric model of the universe. He was a Jesuit, which is significant because it is well documented that Jesuits have had some serious influence. Visit iLearn.tw/jesuits to watch a very eye-opening documentary: *Jesuits Erasing our Flat Earth*. I strongly recommend watching this great history lesson!

The flat earth model, even up to present, hasn't ever totally died and there are examples of the flat earth model after 1543. Books like *Zetetic Cosmogony* by Thomas Winship published in 1899, *Terra Firma: The Earth Not a Planet Proved From Scripture, Reason and Fact* by David Wardlaw Scott, 1901, and *Kings Dethroned* by Gerard Hixson, 1922 (where he details all of the problems with heliocentrism and the mistakes made by people like Nicolaus Copernicus, Albert Einstein, Isaac Newton, Johannes Kepler, and so on) are all evidence of flat earth prominence. These fine men were also tightly-knit with Jesuits, or Jesuits themselves.

From the 1900s to present we can also find many flat earth pockets and puddles, but the mainstream programmers have done a damn good job of putting the kibosh on them. Why would any reasonable person suppose they couldn't? After all, they've done a pretty damn good job of having us move on and forget what happened on September 11, 2001. Most people don't even know there were three buildings that fell with just two airplanes at free fall speed that day. Today, most children are reading textbooks that associate Muslims with it? Yea... Seriously.

In a magazine from August 1931, called *Popular Science*, explorer Auguste Piccard, after ascending 10 miles high on a balloon, went on record stating it: "seemed a flat disk with an upturned edge". This was at only a little over 50,000 feet. Today we have balloons going up to 23 miles and the earth still shows nothing but flatness, with the horizon remaining at eye level at all times. This is not possible on a sphere. Mainstream science says that curvature becomes visible at 35,000 feet, and this simply is not so.

We know that heliocentrism/spinning-ball earth has been pushed since the 1500s (thanks Nicolaus Copernicus - ya secret Jesuit agenda running shill!). It wasn't until the early 1900s that moves were made to ramp up the deception. In fact they started programming us in 1912, before earth's shape was even supposedly proven. We have been shown a spinning globe before every movie by Universal Pictures for over 100 years. That alone is HUGE! In 1946, Admiral Richard E. Byrd led an expedition to Antarctica in "Operation Highjump". They say they went to Antarctica to train, test equipment, and examine the possibilities of establishing and maintaining military research bases there. They claim to have charted the Antarctic coastline during this time. In 1955, more research bases were added in an expansion of Highjump, called "Operation Deep Freeze". Then NASA was established in 1958, followed by the proposal of the Antarctic Treaty of 1959, and the implementation of it in 1961. This treaty basically put Antarctica off-limits to civilians, with the exception of guided tours that are carefully supervised.

In 1962, "Operation Fishbowl" took place where they fired so-called "nuclear missiles" straight up for high-altitude nuclear tests. It is almost like they were trying to mess with the firmament somehow. The name "Fishbowl" is also symbolic for the enclosed nature of our world. U.S. President John F. Kennedy also gave his famous "We choose to go to the moon" speech in front of a large crowd gathered at Rice Stadium in Houston, Texas on September 12, 1962. It sure seems that all of these events tie into these guys finding out about the true disposition of earth, including the crystalline canopy that we can not get past.

In 1966, Lunar Orbiter 1 captures the supposed first ever pictures of earth from deep space and they look joke-level fake! Two years later, in 1968, Apollo 8 captures another fake-ass picture of the blue-ball earth. In 1969, Apollo 11 puts man on the moon for the very first time. In 1972, on their 6th and final trip to the moon, we get one of the most famous pictures of all time, the blue marble. These alleged pictures of earth, especially 1972's blue marble, are the entire reason behind pretending to go to the moon in the first place.

This puts the coffin-nails in the spherical/flat earth debate. The ancient cultures of the world and all of the flat earth authors couldn't be more wrong, because NASA 'proved' that you live on a spinning ball in 1972, that looks just like what Universal Pictures predicted in 1912.

Today curvature cannot be detected by anyone on earth. Motion can't be detected, nor has it ever been proven, and we can't figure out how to get past low Earth orbit.

"Early in the next decade, a set of crewed flights will test and prove the systems required for exploration beyond low Earth orbit."
- Obama, April 15, 2010.

"This is the spacecraft that's going to take humans to explore the solar system. It's the next big step for NASA in exploration."
- Mark Geyer, NASA Orion program Manager.

There are many other examples, but let's move on to save time and paper. Space agencies are certainly not trying to hide these limitations. We are living in a realm with actors like Neil DeGrasse Tyson telling us about there being too much space debris floating around earth to safely exit anymore, and Bill Nye the Science Guy telling us that "Earth is a closed system; we cannot leave the Earth. There is no place to go."

Low earth orbit is between 99 miles and 1,200 miles. The moon, according to the heliocentric model, is about 237,000 miles away. That's a HUGE difference! Why was it so easy to go to the moon six times between 1969 and 1972, but we can't go even 1% of that distance today? We can't even go 1%, and they blame it on the idea of a "Van Allen radiation belt". This is the cover story for the firmament. We live on a flat plane inside of an enclosed structure. It has always been this way. The numbers of flat earthers are only getting bigger, and at a staggering rate. People who hyperventilate because of this debate, usually blame a failing education system. Indeed, you could argue that *they* are in fact, the poor victims of government-mandated indoctrination centres, or schools. In the grand scheme of things, the deception of heliocentrism has been a short-lived attempt at taking man ever further from his or her divine nature.

地球歷史

早期對世界的描述顯示出它是平的，被一個圓頂蓋住。古代埃及人、北歐人、印度人、馬雅人、印加人、納瓦霍人、希伯來人和其他古文明都知道世界是平面的，包圍在無可穿透的蒼穹之下。這樣的認知一直處於主流，直到哥白尼在 1543 年提出日心說模型為止。他是個耶穌會信徒，這很值得注意，因為耶穌會的重大影響有諸多文獻記載。到 iLearn.tw/jesuits 觀賞一部讓你大開眼界的紀錄片：*Jesuits Erasing our Flat Earth*（耶穌會剷除地平說）。我大力推薦你觀賞這個重大的歷史教訓！

甚至時至今日，平地模型都還沒完全滅絕，在 1543 年之後還有平地模型存在的例證。像是 Thomas Winship 出版於 1899 年的 *Zetetic Cosmogony*、David Wardlaw Scott 出版於 1901 年的 *Terra Firma: The Earth Not a Planet Proved From Scripture, Reason and Fact* 還有 Gerard Hixson 出版於 1922 年的 *Kings Dethroned*（其中詳細說明日心說所有的毛病，還有如哥白尼、愛因斯坦、牛頓、克卜勒等人犯的錯誤）等書，都是地平說主導思潮的證據。這些傑出人士也和耶穌會關係密切，或本身是耶穌會信徒。

從 1900 年代至今，我們也能找到很多地平說的資料，但主流媒體太厲害了，操弄著人們的所見所聞。哪個講理的人會認為他們做不到呢？畢竟他們已經在 911 的粉飾太平上做得非常好，讓我們忘卻發生了什麼事。大部分的人甚至不知道 2001 年 9 月 11 日那天只有兩架飛機，就能讓三棟大樓以自由落體的速度坍塌。今天，大部分的孩子在讀的教科書都說事件跟穆斯林有關？是喔...真的。

在一本出版於 1931 年 8 月稱為《大眾科學》的雜誌裡，探險家奧古斯特·皮卡爾在搭乘氣球上升到 10 英哩（約 16 公里）的高度之後，公開發表說：「看起來像個邊緣上翹的平面盤子」。這只是在稍微高於 50,000 英尺（約 15 公里）的高度而已。今天我們有上升至 23 英哩（約 37 公里）的氣球，而地面看起來還是平的，而且地平線一直維持在視線高度。這個現象在球體上是不可能存在的。主流科學說從 35,000 英尺（約 11 公里）開始可以看到曲度，但明明就沒有。

今天，世界上的任何人都偵測不到曲度。星球運行偵測不出來，也沒被證實，而且我們找不到超出近地軌道的方式。

「早在未來的十年內，一系列的載人飛行將會測試和檢驗近地軌道外探索所需的系統。」— 2010 年 4 月 15 日，歐巴馬總統。

「這是即將帶人類前往探索太陽系的太空船。它是 NASA 往探勘邁進的一大步。」— 獵戶座計畫主管蓋雅。

還有很多其它的例子，但為了節省時間和紙張，讓我們移到下個話題。太空總署根本沒在嘗試隱藏這些侷限。我們的世界裡有像尼爾·德格拉斯·泰森這樣的演員，說地球周遭浮著太多太空垃圾，再也不能安全離開地球了，還有《比爾教科學》告訴我們「世界是個封閉的系統；我們不能離開。無處可去。」

近地軌道的高度介於 99 和 1,200 英哩（約 160 和 2,000 公里）之間。根據日心說模型，月亮位於 237,000 英哩（約 384,400 公里）之外。這是非常大的差異！為什麼從 1969 到 1972 年去月球六趟有那麼簡單，可是在今天，我們連 1% 的距離都沒辦法突破？我們連 1% 都到不了，而他們怪罪於「范艾倫輻射帶」這個概念。他們用這個謊言來隱瞞蒼穹的存在。我們生活在一個封閉結構內的平面。一向以來都是如此。地平論者的人數在持續增長，而且速率驚人。氣急敗壞爭辯這不是實情的人通常會怪罪失敗的教育系統。的確，你可以說他們真的是國家指定的思想灌輸中心（或稱學校）之下的受害者。就長遠來說，日心說的騙局企圖使人類越來越脫離其神性，持續不了多久。

Some Common Flat Earth Questions

一些常見的地平論相關疑問

How can you be sure you're not being lied to when they tell you Earth is flat? 🦄

This is a common question, and certainly a good one. How can *you* be so sure *you're* not being lied to about your ball earth? The answer is simple. We can not be sure. However, there SURE seems to be some major problems with heliocentrism and NASA.

Where is the edge? 🌳

We don't know. Considering what is ever becoming more common knowledge amongst the masses, governments around the world are kind of just there to divide and conquer. Obvious false-flags, and other epic fails, witnessed in recent years, make it not completely farfetched to suppose they could stand to benefit by keeping us contained. Keeping us consumers. Keeping us focused on our differences, as egomaniacal unconscious slaves believing they came from a magical explosion or chance. It is, after all, almost like keeping this realm clear of love and unity is the goal of the psychopaths at the top. There are ancient texts that point to the antarctic ice wall that encircles the flat earth as a kind of icy-cold barrier holding us in. Other ancient texts have pointed to there being more land and suns and moons in outer worlds, or circles beyond the circle we are stuck in. It isn't hard for people to imagine infinity when thinking in terms of outer-space, but somehow imagining infinity on a flat earth is not even considered, but we don't know. We will be shot if we try. Seriously! The Antarctic Treaty was established in 1959, and nobody has been able to independently explore there since.

Where does the sun go if the earth is flat? 🌅

The sun and moon are very close, and each, independent sources of light, that travel around the flat earth clockwise. They simply go into the vanishing point. The sun's light is warm and heats things up, and the moonlight is cold. Yes, that's right! You won't see anyone with an infrared thermometer gun testing this out on a "science" show, or learn about it in an imagination station a.k.a. science centre. There are some videos online of people trying this experiment. Reading the outside surface of asphalt in the moonlight and noticing it to be colder than the surface in the shade of the moonlight, under a tree for example. It is neat, and crushes conventional understanding to say the least. Maybe that's why you haven't heard of this. As for the sun, it is much smaller and closer. The human eye can only see so far due to moisture, dust, pollution, and so on. On an Alaskan cruise ship it is not unheard-of to see complete daylight on one side of the ship, and complete dark/night on the other. Your eyes can only see an object until it goes into, not over, the horizon. Light isn't what you've been taught. If you believe a government entity is "so smart" they can tell you how many millions of "lightyears" a star is away, you can't be helped. Chances are you've always had a buried conscious-knowing that this kind of information isn't science, or correct.

當他們告訴你地球是平面的時候，你怎麼能確定他們沒騙你？ 🦄

這是個常見的問題，而且問得好。 當他們告訴你世界是球體的時候，你怎麼能確定他們沒騙你？ 答案很簡單。 我們不能確定。 不過，日心說跟 NASA 絕對有些重大毛病。

邊緣在哪裡？ 🌳

我們不知道。 有鑑於這方面的知識越來越普及於大眾：世界各地的政府就只是在離間和各個擊破。 我們近年來目睹了明顯的政治嫁禍和其它的重大敗筆，不禁讓人懷疑政府可以藉由持續掌控我們來獲利。 讓我們繼續消費。 讓我們繼續把注意力放在彼此之間的差異上，在此同時無意識的極端自我主義奴才深信他們的存在來自於一場魔法般的爆炸，或純屬偶然。 畢竟，位居頂端的精神變態者們的目標好像就是不讓這個世界上的人們互敬互愛、和諧共處。 有古老文獻指出南極冰牆圍繞著平面的世界，像是種寒冷的柵欄將我們包圍在內。 有其它古老文獻指出在其它外在世界（或我們所在圓圈之外的圓圈）有更多的土地、太陽和月亮。 對人們來說，想像無窮盡的外太空並不難，而卻沒有人考慮過可以想像一個無窮盡的平面世界，但我們不知道。 如果我們企圖這麼做就會被射殺。 說真的！《南極條約》簽署於 1959 年，自此之後就沒人能獨立探索那個區域。

如果世界是平的，那太陽下山之後去哪裡了？ 🌅

太陽跟月亮非常接近，各自是獨立的光源，以順時針的方向沿著平面的世界移動。 它們只是進到消失點而已。 陽光是熱的，會為物體加溫，而月光是冷的。 是的，沒錯！ 你不會在「科學」節目上看到人用紅外線測溫儀測試，或在科學中心（又名幻想站）聽到這種說法。 網路上有些人們嘗試這項實驗的影片。 他們注意到，在月光下讀出的柏油路面溫度比在陰影中（例如樹下）的路面溫度低。 這是項很新奇的發現，至少可以說，它打破了傳統的認知。 也許這就是為什麼你都沒聽說過這件事。 至於太陽呢，它比教科書說的小很多、離我們近很多。 因為濕氣、灰塵、污染等的關係，人類的視力所及有限。 在阿拉斯加郵輪上，有時可以在船的一邊看到完全白天，而在另一邊則是完全的黑暗/夜晚。 直到一個物體進到（而不是越過）地平線之前，它都在你的視線範圍之內。 光線跟你在學校學到的並不一樣。 如果你相信政府機構有「聰明」到可以告訴你一顆星星離我們有多少百萬的「光年」，那你無藥可救了。 不過，你很有可能一直有著深藏的覺知：這種資訊並不科學，也不正確。

What's underneath the flat earth? 🤔

Mainstream knowledge indicates that we know less about what is underneath our feet than what is in the solar-system. We have also been shown cute CGI images that detail all that is inside our ball earth. It is ridiculous! We have discovered the opposite kind of evidence than would be expected in earth samples taken from the deep. There are probably five elephants and a giant swimming turtle.

What about ships disappearing? 🚢

This example reeks of pseudoscience to say the least. Take a telescope to the beach and play a game of “now you see it, now you don’t” with yourself, or just play with yourself. This point is also addressed in ISSUE #2 “We are being robbed!”.

What about all the pictures of the Earth? 🌍

There are no pictures of Earth. Yea, that’s right folks! Just CGI images. You are living on a painting. Look it up! This question is also addressed in the “We are being Robbed” article of ISSUE #2, in the third paragraph.

Why are all the other planets round? 🪐

They are round points of light. That’s all we really know. We have never been to the Moon and certainly not Mars. What makes you think the pictures we are fed of them aren't also CGI images? Of course they are! Pluto even has the outline of Pluto the cartoon dog on it. Wakie-wakie!

What about satellites and GPS? 📶

Satellites are a hoax. GPS uses triangulation off of cell phone towers. This question is addressed beautifully in the “We are being Robbed” article of ISSUE #2, in the fifth paragraph. If all it takes to convince you that satellites are real is a website claiming to show you in real time the tracking of them, or Google Earth for example, you can't be helped. It's also entirely possible that ribbons of imagery from low-flying, high-altitude drone aircraft could be stitched together. Didn't it always seem a bit hard to believe that such clear pictures of Earth could be gotten from satellites in space? Couple this with Google Street View, and hopefully we have some realization... or maybe you are still playing at the beach!

Is outer-space even real? ✨

Some say there are waters above and below, but we simply don't know. Points of light that look like stars, appear in water when a vibration is introduced. It seems a bit ridiculous to suppose a vacuum and nonvacuum can exist with nothing separating them. The only thing NASA has taken to space is your imagination.

How is circumnavigation possible on a flat earth? 🌐

Of course, but not North - South. Only East - West. The north pole is actually more of a mystery than you have been told, but an even bigger mystery, is of course, our ice-wall in the south. Everything you think you are doing on a globe is completely possible on a flat earth.

平面的世界底下是什麼呢? 🤔

主流知識顯示出我們知道太陽系有些什麼比知道我們腳下有什麼還多。我們也看到可愛的 CGI 影像，詳細描繪著我們地球裡的一切。太可笑了！我們從深層地底採出的樣本發現的證據跟預期中的完相反。說不定還有五頭大象和一隻巨大的烏龜。

那消失在海平線的船隻呢? 🚢

這個例子，說它是偽科學一點也不誇張。拿望遠鏡到海邊跟自己玩「忽隱忽現」的遊戲，或就只是玩你自己。在第 2 期《我們被搶了！》一文中也有說明這點。

那所有的地球照片呢? 🌍

地球是沒有照片的。是的各位，沒錯！只有 CGI 影像。你住在一幅畫裡。去查查看！在第 2 期《我們被搶了！》的第三段也有討論到這個問題。

為什麼其它行星都是圓的? 🪐

它們是圓形的光點。我們實際知道的就只是這些。我們從沒去過月球，而當然更沒去過火星。你怎麼能知道我們所看到的那些圖片不也是 CGI 影像？當然是啦！冥王星上甚至有卡通狗布魯托的輪廓。醒醒吧！

那衛星跟 GPS 呢? 📶

衛星是場騙局。GPS 用手機基地台的三角測量。在第 2 期《我們被搶了！》的第五段有精確剖析這個問題。如果光是一個網站（例如「Google 地球」）號稱會顯示衛星的即時追蹤給你看，就能說服你衛星是真的，那你無藥可救了。由低空飛行、高空無人飛機拍攝的影像也十分有可能可以拼接在一起。從太空的衛星可以拍出這麼清晰的地面照片，你從不覺得有點難以相信嗎？再跟「Google 街景服務」對照之下，希望我們會有點領悟...或者，你還在海邊玩！

外太空真的存在嗎? ✨

有些人說天上地下都有水，但我們實在不知道。當水中發生振動時，就會出現看起來像星星的光點。假設真空和非真空可以在沒有分隔的狀態下同時並存好像有點荒謬。NASA 唯一帶上太空的是你的想像力。

在平面的世界上怎麼有辦法環遊世界? 🌐

當然可以，只是不能南北行。只能東西行。北極其實比你所學到的還要神秘；但當然了，更大的謎團，就要屬位於南極的冰牆。你自以為在一個球體上進行的一切，都完全可以在平面的世界上進行。

Some Common Flat Earth Questions

一些常見的地平論相關疑問

What about seasons? 🌍

The small, close sun circles closer and further from the North pole seasonally. Basically the same idea of what happens on a globe, but flattened out.

What about gravity? 🤖

Gravity is a scapegoat for all that cannot be explained and it has never been proven. It's all about density and buoyancy. If something is heavier than air it falls. Gravity is a bullshit word we have in place of density. Mainstream science basically says gravity is God because it explains everything. It is used to explain the magical line of vacuum and non-vacuum space.

"The 'law of gravitation' is said by the advocates of the Newtonian system of astronomy, to be the greatest discovery of science, and the foundation of the whole of modern astronomy. If, therefore, it can be shown that gravitation is a pure assumption, and an imagination of the mind only, that it has no existence outside of the brains of its expounders and advocates, the whole of the hypotheses of this modern so-called science fall to the ground as flat as the surface of the ocean, and this 'most exact of all sciences,' this wonderful 'feat of intellect' becomes at once the most ridiculous superstition and the most gigantic imposture to which ignorance and credulity could ever be exposed." - Thomas Winship, 'Zetetic Cosmogeny' (36)

What about the Coriolis effect? 🌀

We are told it is a result of the Earth spinning. This is not always predictable. It's disproven actually. Look it up. No aircraft has to account for it.

Why can't I see infinitely far? 🔭

Because of science. It is called the vanishing point. Of course we can't see infinitely far! Wake up!

Is the flat earth a religious thing? 🏠

It doesn't matter. Whether you are religious or not, you can still see the flat earth. There's a lot of bullshit out there to sift through. Beware of "the flat earth society" in particular. They are a gatekeeper and regarded as a nonsensical shill by true flat earthers. Check out Eric Dubay if you would like to be introduced to flat earth. Also see iLearn.tw/flaearth.

Are all pilots, scientists, and governments in on it? 🐼

They have been indoctrinated just like most of us have. If any do believe the earth is flat they would certainly keep quiet for fear of ruining their reputation or losing their job.

那四季呢? 🌍

離我們很近的小太陽依季節循環靠近和遠離北極。基本上就跟在球體上的道理一樣，只是變成平面了。

那萬有引力呢? 🤖

萬有引力從來沒被證實過，只是在幫所有無從解釋的現象背黑鍋。一切都跟密度和浮力有關。如果東西比空氣重就會落下。萬有引力是被拿來取代密度的屁話。主流科學基本上說萬有引力就是上帝，因為它解釋了一切現象。它被用來解釋真空和非真空的空間之間的魔法界線。

「牛頓系統天文學的擁護者說『引力定律』是科學最偉大的發現，也是整個現代天文學的基石。因此，如果可以證明引力純粹是假設，而且只是心智的想像力，在其解析者和擁護者的頭腦之外並不存在，那麼這個所謂現代科學的整個假設就會一敗塗地，而這個『精密科學之最』，這個美妙的『知識壯舉』就會立即成為最荒謬的迷信，無知與輕信所能經歷最偉大的詐欺騙局。」
- Thomas Winship, 'Zetetic Cosmogeny' (36)

那柯氏效應呢? 🌀

我們學到那是地球旋轉而產生的結果。這不是一直可預測的。實際上，那已被證明是不正確的。去查查看。飛機航線完全無從解釋。

為什麼我沒辦法看無限遠? 🔭

因為科學的關係。那叫做消失點。我們當然沒辦法看無限遠！醒醒吧！

地平論跟宗教有關嗎? 🏠

那並不重要。不管你有沒有宗教信仰，都能看到平面的世界。外邊有很多狗屁要仔細過濾掉。尤其要當心「地平說學會」。他們是真相的擋門者，在正港的地平論者眼中，他們是北七走狗。如果想瞭解地平說，就去看看 Eric Dubay 囉。另外請見 iLearn.tw/flaearth。

所有的飛行員、科學家和政府都有參一咖嗎? 🐼

他們就跟我們大多數人一樣被思想灌輸了。就算他們之中有人相信地平說，也一定會保持沈默，唯恐聲名掃地或飯碗不保。

NASA isn't the only space program. Are all others in on it too? 🤖

Yes. Money and banks control the governments, and the governments control the people; not the other way around. This is just another part of the package deal our illustrious, elected or not, leaders are to feed or support. Space agencies are especially compartmentalized. The left hand doesn't know what the right hand is doing. Another fun and interesting little tidbit of information, is the vector logo symbology in their space programs. The covert symbolism that space agencies around the world use is just the beginning, and the question really becomes, who or what are these people paying homage to?

Why the lie? 🤖

We are one of a septillion (MANY zeros) other planets flying through space. They want us to think we are just a cosmic accident from a "big bang" fourteen billion years ago. They want us to think that life is meaningless, and they don't want us to understand our origin. They push the alien agenda to distract us into thinking we originated from aliens. They may even shock us with a fake alien invasion or a fake disclosure. They could be hiding more land, or other worlds. We really don't know. We are created special and with purpose that's being hidden on purpose. We have been totally fooled by the economic fiat money system that feeds this manufactured reality. We were never meant to live like this and knowledge of the flat earth is a step in the right direction. Not all of us will willingly accept their one-world authority. The ones that do are not necessarily wrong or stupid, but rather victims of their own fear.

Who is responsible for this deception? 😈

Evil people. It doesn't matter what you believe is true, because you can't deny that there are elitists at the top, who are not strangers to screwed up clubs, societies, rituals, pedophilia, murder, spirit cooking, and so on. You may not believe in "evil", but they do!

A stronger argument doesn't mean it is true.
What is the greatest symbol of human oppression ever?
The globe.

比較強而有力的論點並不代表就是真相。
人類壓迫史上最大的表徵是什麼？ 地球。

NASA 並不是唯一的太空計畫。其它太空計畫也都參與其中嗎? 🤖

對。金錢和銀行控制政府，政府控制人民；人民無從支配政府、金錢和銀行。這就只是我們顯赫的領導者（不管是否經由選舉產生）必須支持或助長的全套交易的另一部份。太空總署的劃分尤其嚴重，沒有一致的對外說法。另外一個有趣的小花絮，就是太空計畫中的向量標誌符號學。世界各地太空總署使用的祕密象徵符號只是個開端，真正的問題是：這些人是在對誰，還是在對什麼宣誓效忠？

為什麼要製造謊言？ 🤖

我們是 10^{24} （非常多個零）個飛過太空的繁多行星之一。他們要我們以為自己只是一百四十億年前的一場「大爆炸」生成的宇宙偶然事故。他們要我們認為生命是無意義的，不想讓我們得知自己源自何方。他們鼓吹外星計畫來讓我們誤以為我們源自外星人。他們甚至可能用假外星侵略或假解密來震驚我們。他們可能隱藏了更多土地，或其它世界。我們真的不知道。我們生來是特殊的，而我們的生命目標被特意隱藏起來。我們完全被助長這個虛構現實的法定貨幣制度給騙了。我們原本就不應該像這樣過活，而對地平說的認知是往正確方向前進的一步。並不是我們所有人都會甘願接受他們的單一世界威權。會這樣做的並不一定就是錯或愚蠢的，而是出於他們自身的恐懼。

是誰在這樣欺瞞大眾？ 😈

邪惡的人們。你相信什麼是真的並不重要，因為你不能否認有精英主義者位居頂端：對他們來說，亂七八糟的社團、協會、儀式、戀童癖、謀殺、靈體烹飪等等，都是家常便飯。你可能不相信「邪惡」，但他們信！

It's a Cult!

"Any organization with members subject to unnatural indoctrination (whatever that means), restriction and motivated towards a common goal is a cult." This is just one rather established definition. Most of us have been taught to cling to "correct answers". We are more and more living in a world with answers that can't be questioned, rather than questions that can't be answered.

The one China cult is by far the most successful. Its main goal is to own non-Chinese land, media, enterprise, and industry, as well as the transformation of non-Chinese to window dressers, especially beyond the boundaries of the mainland. A cult of the Mao Zedong variety depends on tactics and groupthink to be sure, but one cannot ignore the fear that accompanies a cult. This fear is a very real and powerful thing, and should not be underestimated. In one experience I have of messing with the minds of cult members (KMT or pro-unification zealots demonstrating in Taipei), by mockingly chanting "Mao Zedong one China!" and derisively displaying fear, it didn't take long before I knew that something was off. Something wasn't quite right about these people. As if being a pro China zealot wasn't enough. 🙄

I am conscious, and have consciously decided to live my life trying to recognize and avoid cult-like situations and to celebrate freedom of speech, freedom from cults, and freedom from fear. There is indeed nothing to fear but fear itself!

Enough pussyfooting around the meat and potatoes. Statism is a cult (and government is sin). This is going to be explained in more detail in a future publication, but you can probably see where I am going with it. These statism cults I speak of are a tricky thing. Stockholm syndrome is a real thing, and therefore it isn't out of the realm of reality to imagine that we are, perhaps all mildly to severely, in a cult now. One telltale sign that you are in this cult of statism, or any cult, is that you don't think you are, and intensely oppose the idea. People who are your friends may be in them too. You will know this when, for example, you find yourself shocked by them not coming to your defense, as others drag your name, company and character through the dirt. Forgive them; they will not come to your defense, but will watch as others tear you apart. It happens in North Korea too, when a child will report his own mother and watch as she is publicly hanged for example. You can only come to terms with it and move on.

The nail that is sticking out gets hammered down. People, humans, are more sheep-like than sheep. Sheep need a sheepdog to keep them in line, but people act as both sheepdogs and sheep. I have first-hand experienced this. Before the release of ISSUE #1, I received a personal message out of the blue, from a complete shart-faced stranger who asked me if I believed the earth was flat. I responded by asking him why, and if he thought it was flat. He responded, "I think it would be best for you to not tell anybody. It's so nutty of an idea that people will generally not confront you on it and I see you're the owner of a school and people may avoid you. Best to keep it to yourself."

After ISSUE #1 was released, I was made privy to some buzz about it on a small Facebook group by my best friend (****). At first I thought it was nice because the post read "The iLearn.tw Magazine is the reading material Taichung deserves", and I immediately added myself to the group and sent a friend request to the man who posted this. I also sent a personal message of thanks and gratitude, but it wasn't long before I realized it was a sarcastic post and not meant to support my business here. After the very unhealthy/stupid act of exposing my eyes to the ridicule in that group, I knew that anything I may have to add, post, or say, would just result in higher levels of attack, so I didn't. It was interesting to notice that shart-face was in this group too.

I poured my heart into ISSUE #1, as my best friend knows, and they ran me into the ground, and in one post encouraged a concerted effort to do something "constructive" and "state clearly our objection to the magazine we have been discussing". Another friend of mine, also in this group, was the first to like this. Seriously!? I am not saying everyone has to agree with me, or love my work, but surely there must be at least SOMETHING nice about the magazine a friend could say. No friend had one positive thing to say in that group, to my knowledge. If they did, it was indeed, too little too late. It was especially telling when I asked my best friend if he had read the magazine, and he told me that he "got the gist of it". Stay with me. I am going somewhere with this longwinded account.

After further investigation, I picked up on a few other key things. People in private, would assure me that the ringleader of this Facebook group who are "skeptical by nature", was a really, really nice guy. I hope so, and he has never sent me any nasty personal messages, so far, but rather only decided to ringleader-style, clearly state objection to my work. From my perspective, the post also elicited my exposure to a ridiculing crowd and in him not being hesitant to stop public opinion from hanging me, he doesn't seem that way to me, but c'est la vie.

Another thing I noticed were the videos that appeared on that group's wall shortly after the excitement of ISSUE #1. They seemed intended to reassure its fragile members of the official 9/11 narrative. It is my personal stance, and the stance of 2,833+ architects and engineers, that three buildings don't fall because of two airplanes. See <http://www.ae911truth.org> or just look into 9/11 for more information. The happenings related to this group seemed cult-esque, but the dead giveaway or coup de grâce, was when another member assured me that the all-wise ringleader had once also doubted the official narrative of 911, but has since "seen the light". This is hilarious! Am I right? Come ON!

It is not my intent to lose my best friend, or any friends, but it would certainly support my hypothesis if I did! Friends know I call a spade a shovel! Ok... I am done! If you aren't smelling cult yet, then I hope you "see the light" soon. 🙏

這是個邪教！

「任何使成員受不合情理的思想灌輸（管它是什麼意思）、約束，驅使朝向一個共同終點前進的組織即是邪教。」這是個滿一致性的定義。我們大多數的人都被教導要墨守「正確答案」。我們生活的世界越來越充斥著不容質疑的答案，而不是無從解答的疑問。

「一個中國」邪教是目前為止最成功的。它的主要目標是要佔據中國之外的土地、媒體、企業和產業，還有將（尤其在中國大陸境外的）非中國人轉變成粉飾門面師。毛澤東品種的邪教絕對仰仗戰術和群體迷思，但我們也不能忽視隨邪教而來的恐懼。這種恐懼是非常真實、強大的，不容低估。在一次經驗中，我以揶揄的口氣向邪教成員（在台北示威的中國國民黨或狂熱的統一支持者）反複喊「毛澤東一個中國！」，以嘲弄的態度假扮害怕的表情，藉此跟他們搗蛋，很快，我就察覺到事態有異。這些人腦筋不太對勁。好像光是當個支持中國的狂熱份子還不夠。🙄

我是有意識的，有自覺地決定要活出自己的生命，試著辨識出類似邪教的情勢並加以避免，頌揚言論自由、不受邪教影響、不受恐懼掌控。的確，除了恐懼本身，沒有什麼可以恐懼的。

好啦，別再拐彎抹角了。中央集權是個邪教（而政府是罪惡）。這點會在未來出版的雜誌有更多說明，但你大概可以看得出來我要講的是什麼了。我講的這些中央集權邪教是很難搞的。斯德哥爾摩症候群是真的，所以，如果我們都是邪教成員（程度輕重不一），這是有可能的。你屬於這個中央集權邪教（或任何邪教）的徵兆就是：你認為你不是成員，而且激烈反抗這種想法。你的朋友可能也是邪教的人。在某些狀況你就會看出來，例如當別人污衊你的名聲、事業和人格的時候，朋友卻不出面為你辯護，讓你很訝異。原諒他們吧；他們不會為你辯護的，只會看著別人把你攻擊到體無完膚。這種情況在北韓也有發生；舉例來說，小孩會檢舉自己的媽媽，看著她當眾被處絞刑。你也只能接受現況，繼續前進。

突出的釘子會被錘頭砸。各位，人類比羊群還怯懦。羊群需要牧羊犬才不會亂跑，但人類表現得同時像牧羊犬也像羊群。我有親身經歷過這種狀況。在發行第1期之前，我忽然收到完全不認識的屁屎臉陌生人寄來的私訊，問我相不相信世界是平面的。我回問他為什麼，他相信世界是平的嗎。他回答，「我覺得你最好不要跟任何人說。這種想法太瘋狂了，人們通常不會跟你爭論，我知道你是一間學校的負責人，人們可能會迴避你。最好不要講出去。」

第1期發行之後，我最好的麻吉(****)告訴我說雜誌在一個Facebook小社團掀起了一些話題。剛開始我以為那是件好事，因為貼文寫著「iLearn.tw 雜誌是台中應有的讀物」，所以我馬上就加入那個社團，傳送交友邀請給發表這則貼文的人。我還寄了致謝和感恩的私訊，但很快就發現那是篇諷刺的貼文，並無意對我的公司表現支持。在不小心看到（實在有夠不健康/太笨了）那個社團的嘲諷之後，我知道如果要補充、張貼或說些什麼，都只會招致更強烈的攻擊，所以就沒這麼做。有趣的是，那個屁屎臉陌生人也在這個社團裡。

我把心力投注到雜誌第1期，我的密友知道這點；而那些人大力猛轟我，還在一則貼文裡鼓吹眾人齊心協力做出「建設性」的舉動，「清楚聲明我們對在討論的雜誌所持的反對意見」。我的另一位朋友（也在這個社團裡）是第一個給這篇貼文按讚的。有沒有搞錯！？我並不是說大家都要同意我的想法，或喜歡我的作品；但身為朋友，這本雜誌應該至少有些地方可以說些好話吧。據我所知，那個社團裡的朋友沒人說過一句正面的話。就算他們有，也太遲了。尤其是當我問我最好的朋友讀那本雜誌了沒，他說「大概知道重點」，我就心裡有數了。繼續看下去。我這麼嘮叨不是漫無目標的。

進一步調查之後，我找出了其它幾個要項：人們在私底下會跟我擔保說這個「質疑一切」的Facebook社團，他們的發起人真的、真的是個好好先生。希望如此；而到目前為止，他還沒寄給我任何下流的私訊，只有決定要發動眾人清楚聲明對我的著作持反對意見。從我的觀點看來，那則貼文也讓我見識到了愛擺爛的一群人，還有看出他們首領的為人：暗自樂見我被群眾攻擊，他看起來不像那樣的人，但這就是人生。

我注意到的另一件事，就是雜誌第1期出版後不久，那個社團塗鴉牆上出現的影片。那些影片的目的似乎在於讓心智脆弱的社團成員消除對9/11官方說法的疑慮。我的立場，還有逾2,833位建築師和工程師的立場，都是：三座摩天大樓倒塌的原因並不是兩架飛機。請見<http://www.ae911truth.org>，或自行研究911即可獲得更多資訊。這個社團的一舉一動看起來都很像邪教，不過真的讓他們露出馬腳的，是另一位成員向我保證說他們智慧無邊的首領曾經也懷疑過911的官方說法，但自此之後已經「大徹大悟了」。笑死人啦！對吧？你馬幫幫忙！

我並無意失去我最好的朋友，還是任何朋友，但如果朋友棄我而去，那絕對就支持我的假設了！朋友都知道我是直腸子！好啦...講完了！如果你還看不出邪教的徵象，那我希望你很快就會「大徹大悟」。🙏

「Vanessa和我是認識多年的朋友，我可以向你保證，
你不會在這個領域找到一個更值得信賴和誠實的专业人士，
她的技術是首屈一指的！」
“As a longtime friend with Vanessa, I can assure you that you
won't find a more trustworthy and honest professional in this field,
and her reputation is second to none!”
